I like it... it's not only indian food...By BioqWe recently got this book after having "the real" indian food with a friend from Goujarat, India and wanting to cook some of his recipes he had made for us, as well as others to surprise him. We were pleased to find that some of the recipes he had made for us where in the book and looked like it was what he had been cooking. Contrary to other books on indian food, which sound very good but are hard to follow (they have no picture, you dont really know what you are doing or an idea of what the result should

look like), this book has a picture for EVERY dish. That is simply priceless. The book is small and compact, which makes it even better. There are also recipes that have kind of an "asian" touch. Overall, so far I would say it's good! After showing this to my indian friend he said this was not the real deal. In fact despised my book. However, I still believe it is good. Remember it says "Discover a world of spice in dishes from India, Thailand and South-East Asia, as well as Africa, the Middle East and the Caribbean, shown in 500 sizzling photographs" so don't expect nothing but indian food recipes. I am still getting another one for my mommy..
