Slane-Ozturk The late Miss Grace was the foremost authority on ancient wine jars, amphorae, and worked for many years at the Agora in Athens. This book is the result of years of experience and therefore gives the reader all the benefit of her wide knowledge. Nowhere else can one find such a succinct look at these very interesting jars. The pamphlet is particularly valuable for the non-expert who just wants to know which type of jar is which, how they were used and what they contained. Very well done!

Although this booklet is based on broken pottery found during the excavation of the Agora, the author ranges far beyond the confines of Athens in her discussion of the purpose and significance of different amphora types. Amphoras were used in the ancient world to transport various different types of products, including wine and oil. The author shows how chronological variations in shape and the geographical clues offered by stamped handles make amphoras a fascinating source of economic information. The booklet illustrates many different forms of amphora, all set into context by the well-written text.
