Castle I acquired this book in the 80's and when I moved from Maine to Florida 11 years ago I left it behind thinking I could find all these recipes online and didn't need to carry all my heavy cookbooks with me. It was a huge mistake leaving this on behind! I spent a few years combing libraries and bookstores trying to find a copy and finally found one here on . This book has many classic recipes from the four most important schools of Chinese cooking; Peking, Canton, Shanghai and Szechuan. It describes the many spices and cooking techniques which has enabled me to make some of the best, healthful dishes I have ever tasted. There are eight different recipes for Hot and Sour Soup and guides for different kinds of diets (diabetic, ulcer and low salt), nutritional content and a wonderful section about tea. As you can tell, I really love it and am so pleased to have it back in my library. 3 of 3 people found the following review helpful. Love to Cook Authentic Chinese Cuisine? This is THE guide By E. HOENSHELL WATSON Just stumbled across this book after two years of amateur cooking at home using all sorts of Chinese cooking authorities, but this book has it all-- completely exhaustive, kind of a Larousse for Chinese cuisine, a full and challenging book. The table of contents could have been expanded, but given the massive coverage for each menu item, that would have been another book altogether. Truly encyclopedic. What a find. If you know how to cook already and have a basic comfort level in the kitchen, and love Chinese cuisine, welcome Ms. Chang home! Count on some very enjoyable evenings!! 1 of 1 people

found the following review helpful. Best on the marketBy Frank E BantonThis is my second copy I have had over the years. This is the best Chinese cookbook on the market. Simple directions and a good history lesson on Chinese foods. It could have used more pictures but that wasn't enough of a distraction to keep me from lowering the score I gave it. Shop around for the best prices because the price range is really big for this book. The second copy I got was for \$4 plus sh used in very good condition. New with free sh ran around \$40 to \$100.
