The ClassicBy Colin PoveyI don't know about today, but for several decades, this was the standard baking and pastry manual at the Culinary Institute of America. Joe Amendola, the author, was one of the original instructors at the CIA when they opened their doors after WWII. He retired from the school about 45 years later as head of Baking and Pastry, and was loved by all who knew him.One thing that many people don't know is that in many smaller restaurants, there is no pastry chef, let alone a baker, and the chef is responsible for desserts as well as the appetizers and main dishes. Because of this, culinary students at most cooking schools learn the essentials of desserts, spending 3-6 weeks out of 1-2 years of their training on desserts. For multiple decades, this was THE manual they used at the CIA, and at the catering company I work for, this is still our standard text for desserts recipes. It contains all the fundamentals you need for making excellent desserts. For home use, you will have to scale the recipes down some, as most make too much for most, but that is not a big deal.In particular, the instructions are very clearly written, with details where you need it, and conciseness where you don't.You simply cannot go wrong with this book.0 of 0 people found the following review helpful.
