I tend to think that a lot of Joly's ideas are just hocus, however this is a seminal book in understanding the thought process behind the making of biodynamic wine. A clear and concise explanation of all of the important ideas - a must read for anyone who is curious about viticulture.0 of 0 people found the following review helpful. Great Introduction to biodynamic

wineBy Alexander EguidazuI like how he introduces us to the concept of how biodynamic wine is made and the importance of it, i would have liked a bit more deeper explanations in why the processes used will have an influence in the grape, but without doubt worth a read and worth buying and appreciating this wines.3 of 21 people found the following review helpful. Not very academic or instructiveBy Lcdo M. RuizI consider the content of the book very dogmatic. There are too much places in which the author asume many things which a not proven.

ldquo;Wine is made in the vineyardrdquo; is the mantra of many a winemaker. But what does it mean, really? Esteemed winemaker and biodynamic pioneer Nicholas Joly believes a wine that is well-made in the vineyard must express its unique terroirdash;the character imbued by a vinerquo;s particular plot of well-tended earth. In *Biodynamic Wine, Demystified*, Joly shares the core philosophy behind biodynamic viticulture and why such practices result in wines of regional distinction. This process treats the vineyard as a self-perpetuating ecological whole influenced not only by terrestrial forces but those of the sun, moon and cosmos. He explains why the use of foreign substances such as pesticides and fertilizers in the vineyard, and aromatic yeasts and enzymes in the cellar, as well as mechanisms such as electric motors and pumps, disrupt this synergy and are ultimately counterproductive to a winersquo;s best, consistent expression.

Biodynamic Wine, Demystified) is not only a consideration of what is authentic in wine. It is a search for a man or woman s place in the world, as neither a scientist nor as a priest, but as a farmer. --*Wine Spirits Magazine*Nicholas Joly is right: he is not a winemaker. He is a thinker, a talker and an idealist, with a captivating passion for his work. His wine is simply the end result of a much greater process. --*Decanter*About the AuthorNicolas Joly is a wine maker and a pioneer in the biodynamic wine movement. He is the author of *What is biodynamic Wine?* and *Wine from Sky to Earth*. Mike Benziger is a winegrower and the general manager of Benziger Family Winery, which was named winery of the year in 2012 by *Wine Spirits* magazine. Joshua Greene is the editor and publisher of *Wine Spirits* magazine.
