Yair Margalit : Concepts in Wine Chemistry before purchasing it in order to gauge whether or not it would be worth my time, and all praised Concepts in Wine Chemistry:

World renowned physical chemist who is a practicing winemaker and university professor. Author of the best selling Winery Technology Operations. This is the product of his years of research and practical winemaking experience. The state-of-the art and science based on all current literature is covered. All aspects of the chemistry of wine and its production based on the components and transformation of grape juice and the chemical changes of fermentation,

aging, cellaring and packaging. Emphasis is on the current knowledge of improving wine quality.
