Great bookBy RecoveringImpulseBuyerI signed up for one of Jennifer's classes through the CAE in Melbourne and was a little disappointed that all we got to do was decorate the cupcakes that she had already made and that we had no recipe with which we could mak our own. So, after several references to her book during the class, I decided to buy it. It has lots of recipes and very clear instructions as well as great photos to inspire your own variations on her decorations.I have made the basic cupcakes recipe with great success and the vanilla buttercream frosting. I have had slightly less success with the frosting, the first time it was great but since then I haven't managed to get the consistency quite right and it has tended to get a bit soft and lose some of the shape of the decoration but I think that's my problem rather than the recipes.All in all a great book and I can recommend it.0 of 0 people found the following review helpful. Beautiful cupcakesBy Aussie CookThis cookbook is more than recipes, it provides a lot of direction on the essentials for baking great cakes. I have baked a lot of cakes and cupcakes but never knew why some cakes turned out better than others. This book explains what are the best

ingredients and how to prepare them to get great results. The cupcake and frosting recipes are delicious and easily explained to get great results even by an amateur cook. The author has shared her secrets to make us all good cooks. 1 of 1 people found the following review helpful. Very happy with it

I bought this book based solely on the cover, I loved the picture! I have tried a few recepies on it and they all turned out perfectly. the 4 star is given just because the measurement sistem is funny, half is metric half is volumetric... and yes, as another reviwer said it comes out more batter than stated for the n. of cupcakes... :)
