Paul D Recchia : Dorm Brewing: Make mankind's favorite beverages in the confines of your own Dorm Room before purchasing it in order to gage whether or not it would be worth my time, and all praised Dorm Brewing: Make mankind's favorite beverages in the confines of your own Dorm Room:

The perfect Christmas Gift for your College Student! College students all over the country spend about 5.5 Billion dollars each year on some of the nastiest, most awful tasting beer in the industry. At an average of \$0.56 per can, how can you blame them? What if you could make your own beer and wine that would not only taste better, but would be just about the same price as this mass-market product? It's not nearly as difficult as people think — in just over one week, you can create a delicious brew of home-made beer or wine with little more than a one gallon plastic container, some water, sugar, yeast, and something to flavor the product with. It really is that simple, and this concept will not only give you a tasty drink to partake in, but will make you the most popular kid in the dorm! So why not suck it up and give it a try. The worst case scenario is that you end up with a tasty beverage to sit back and enjoy with your friends.
